

WP6 – Task 6.3

22.09.2009. REDEA - Seminar - Modern trends in heating systems

The seminar “Modern trends in heating systems” was organized by REDEA on 22nd September in Čakovec. The theme selected was heating since the new heating season will start soon and the energy prices and availability of energy sources are a *hot* topic. The use of biomass for heating was presented by prof.dr.sc. Srecko Svaic from Faculty of Mechanical Engineering and Naval Architecture of University in Zagreb. The companies Centrometal, Vaillant, Viessmann and Danfoss presented their RES/EE products and technologies.

The full report on the seminar is available at:
