

**02.12.2009. SEC model for Medjmurje County adopted**

The SEC model for Medjmurje County developed by REDEA in the scope of NIMSEC project was adopted by **Međimurje Energy Agency - MENE**A, as the agency with the mandate by **Međimurje County for energy related issues in the Međimurje**. One of the main activities of MENE A is the formulation of the energy strategy of the Međimurje County. Along with the broad spectrum of other activities, necessary for drafting proper energy strategy, the SEC model for Međimurje developed in the scope of the NIMSEC project will be a significant input for the strategy formulation process.

SEC model gives a list of measures necessary for increasing the level of energy efficiency and the use of renewable energy sources in order to bring the Međimurje County closer to the aim of being a sustainable energy community.

SEC model for Medjmurje County is available for download at the following internet location:
